Zwelferi Pharmacopeia Augustana J. 2. 17.

Directions how to use the Telescope

Put the Drawers of the Telescope to these marks
and the object will appear plain.

If you would have the object more magnified pull them out longer
and put the eye glasser near together, and so in the middle
if you would have the object lesser and brighter put them
more and remove the eye glasser further asunder.

Directions how to use the Microscope

There are three object glasses that magnifie the object
more or less as they are more or less convex that which
must be used magnifieth most and requires to have the object
nearest to it. Then an object glass that is less
the object must be further near of or further off till it appears
plain.

*Calena Patrum Gregor
De ortu & progressu Linguae Latinae*

[Faint handwritten text, likely a table or list, with some red ink markings.]

[Faint handwritten text, likely a table or list, with some red ink markings.]

Directions how to use the Telescope

Put the drawers of the Telescope to three marks
and the object will appear plain

If you would have the object more magnified put them still
and put the eye glasses near together, and so in the middle
if you would have the object less and brighter put them
more and remove the eye glasses further asunder.

Directions how to use the Microscope

There are three object glasses that magnifie the object
more or less as they are more or less convex that which
most convex magnifies most and requires to have the object
placed near to it. Then an object glass that is less
the object must be placed near or further off till it appears
plain.

Catena Patrum Graecorum
De Vita & progressu Linguae Latinae

Directions how to use the Telescope
 Pull the drawers of the Telescope to their ends
 and the object will appear plain
 If you would have the object more magnified pull them
 and putt the eye glasser near together and so on
 if you would have the object lesser and brighter putt the
 move and remove the eye glasser further asunder

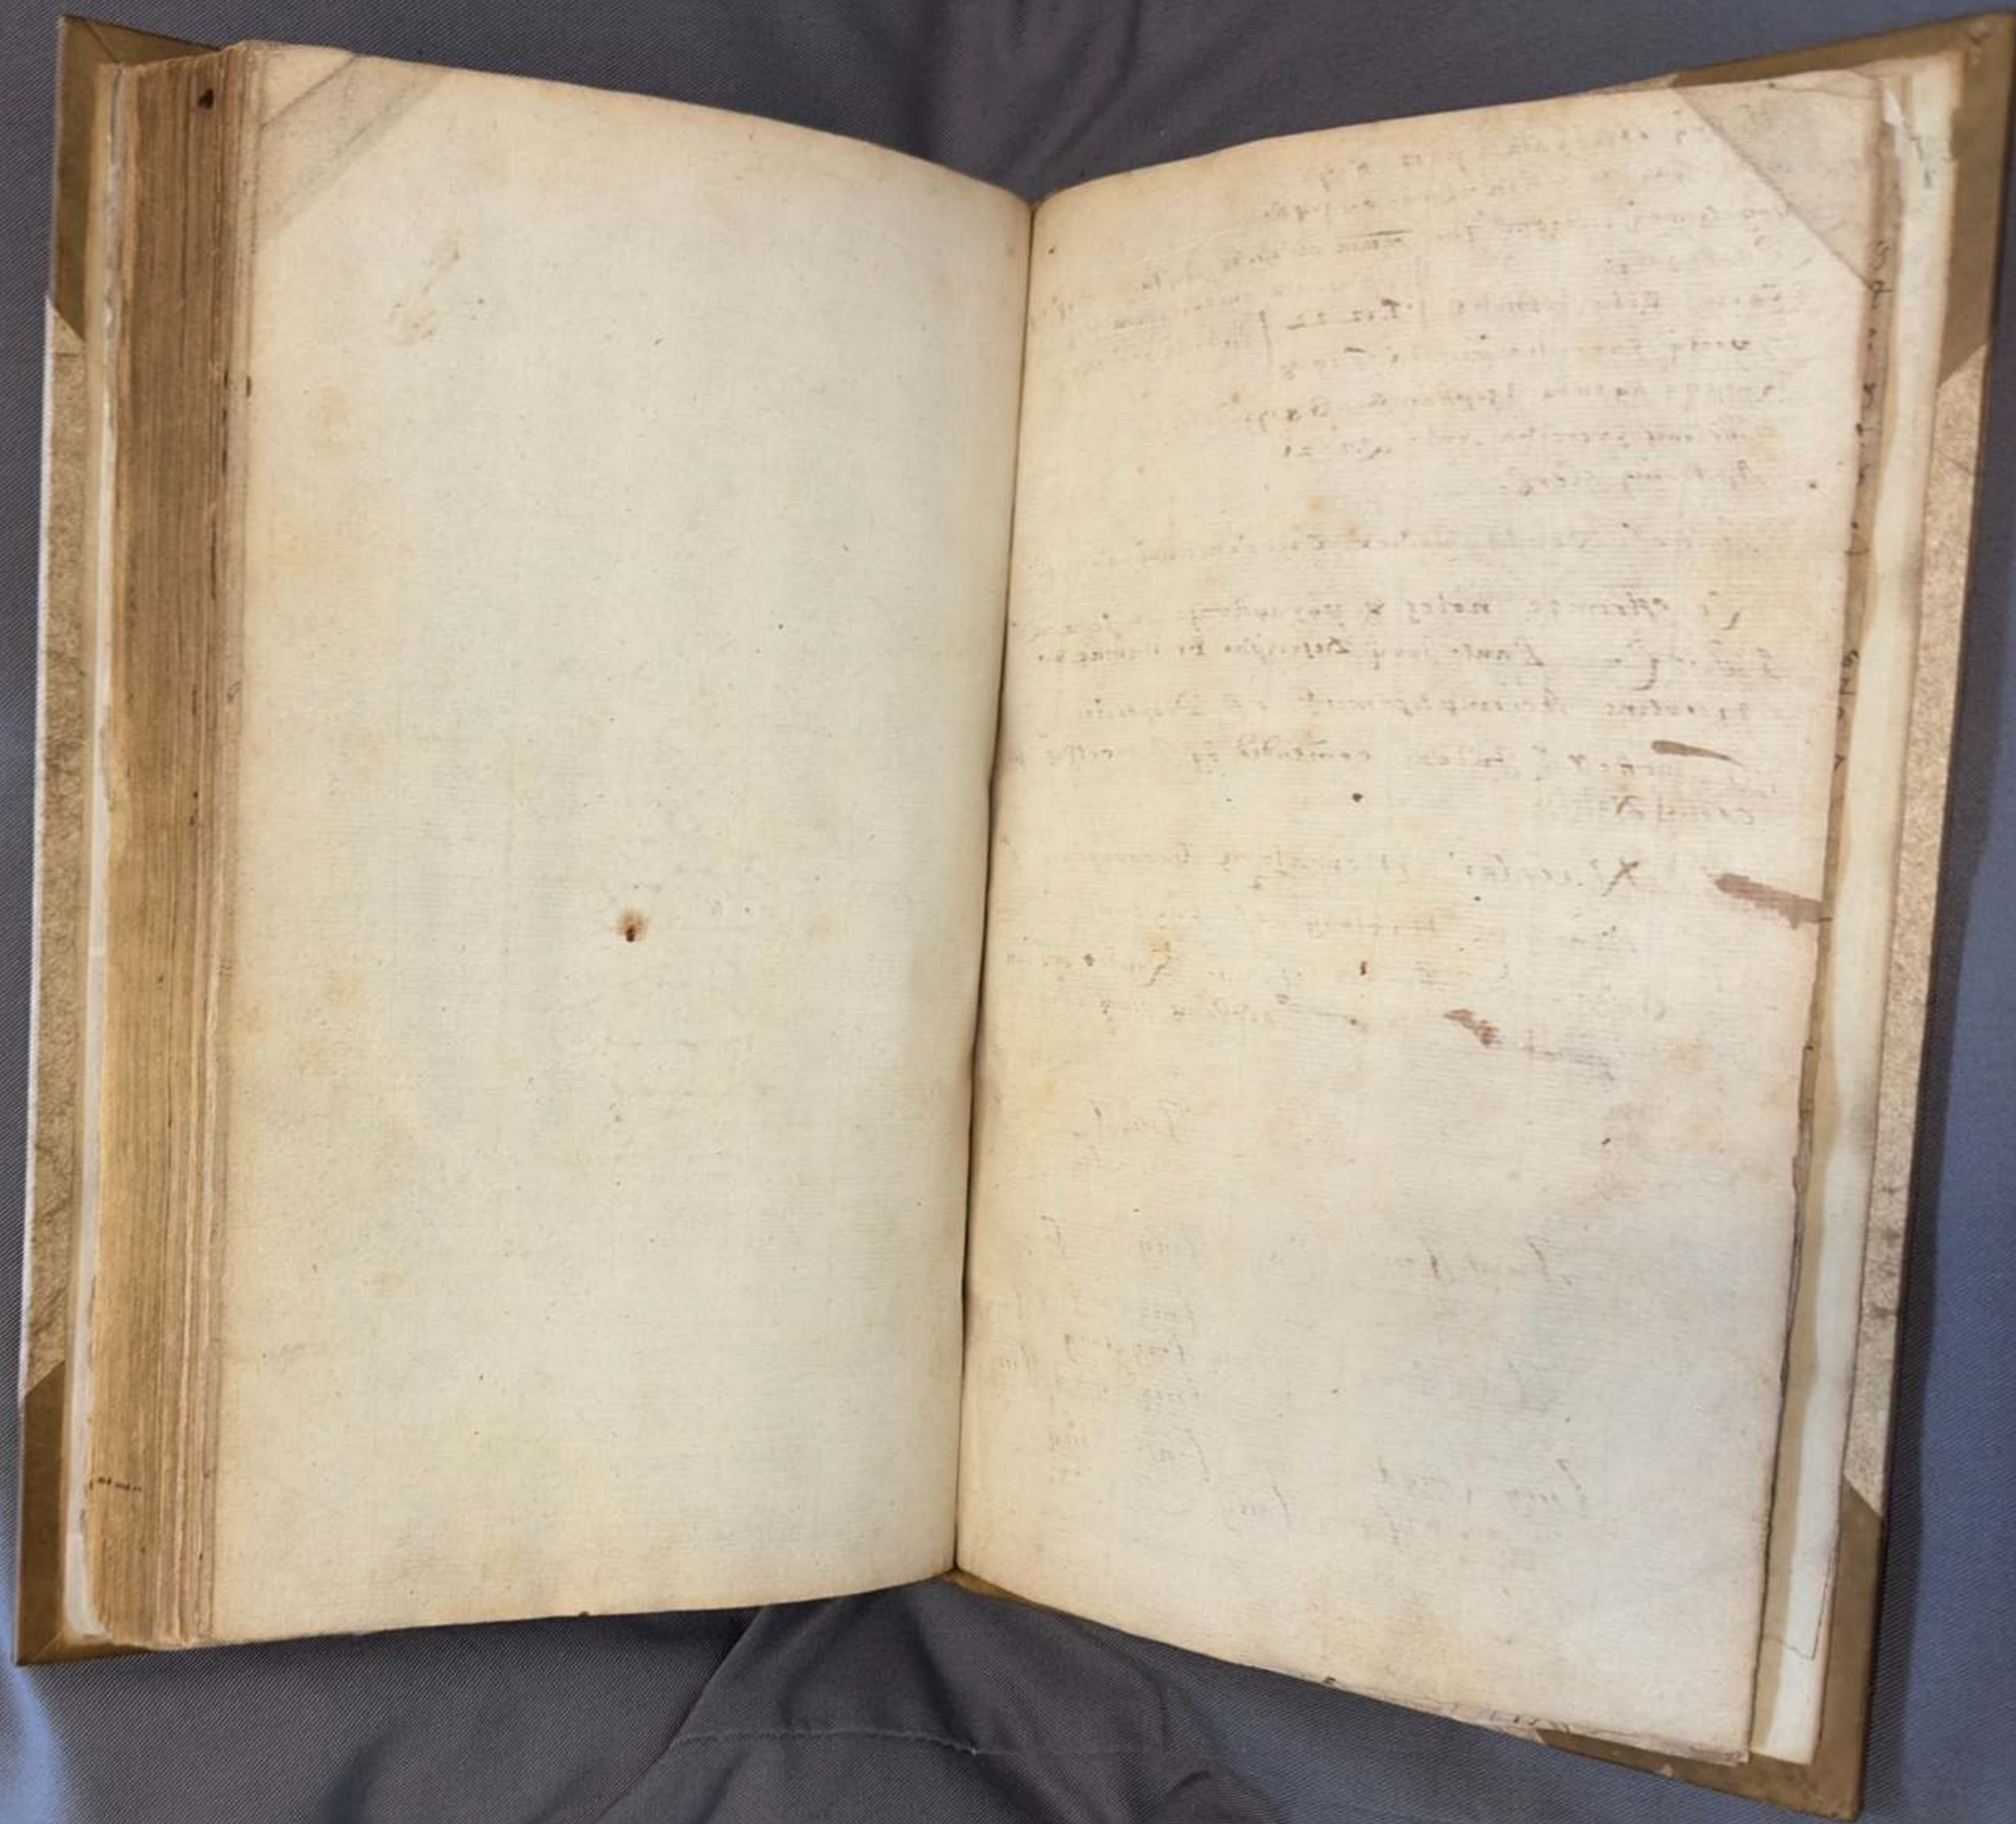

Directions how to use the Microscope
 There are three object glasses that magnifie the object
 more or less as they are more or less convex that is
 most is where magnified most and requires to have the
 specimen near to it. Then an object glass that is less
 the object must be stand near it or further of the
 plane
